

XiPi www.xipi.eu

The largest repository on Future Internet infrastructures ever!

Timo Lahnalampi
InterInnov

Celtic-Plus Event 2014
Monaco, 24 April 2014

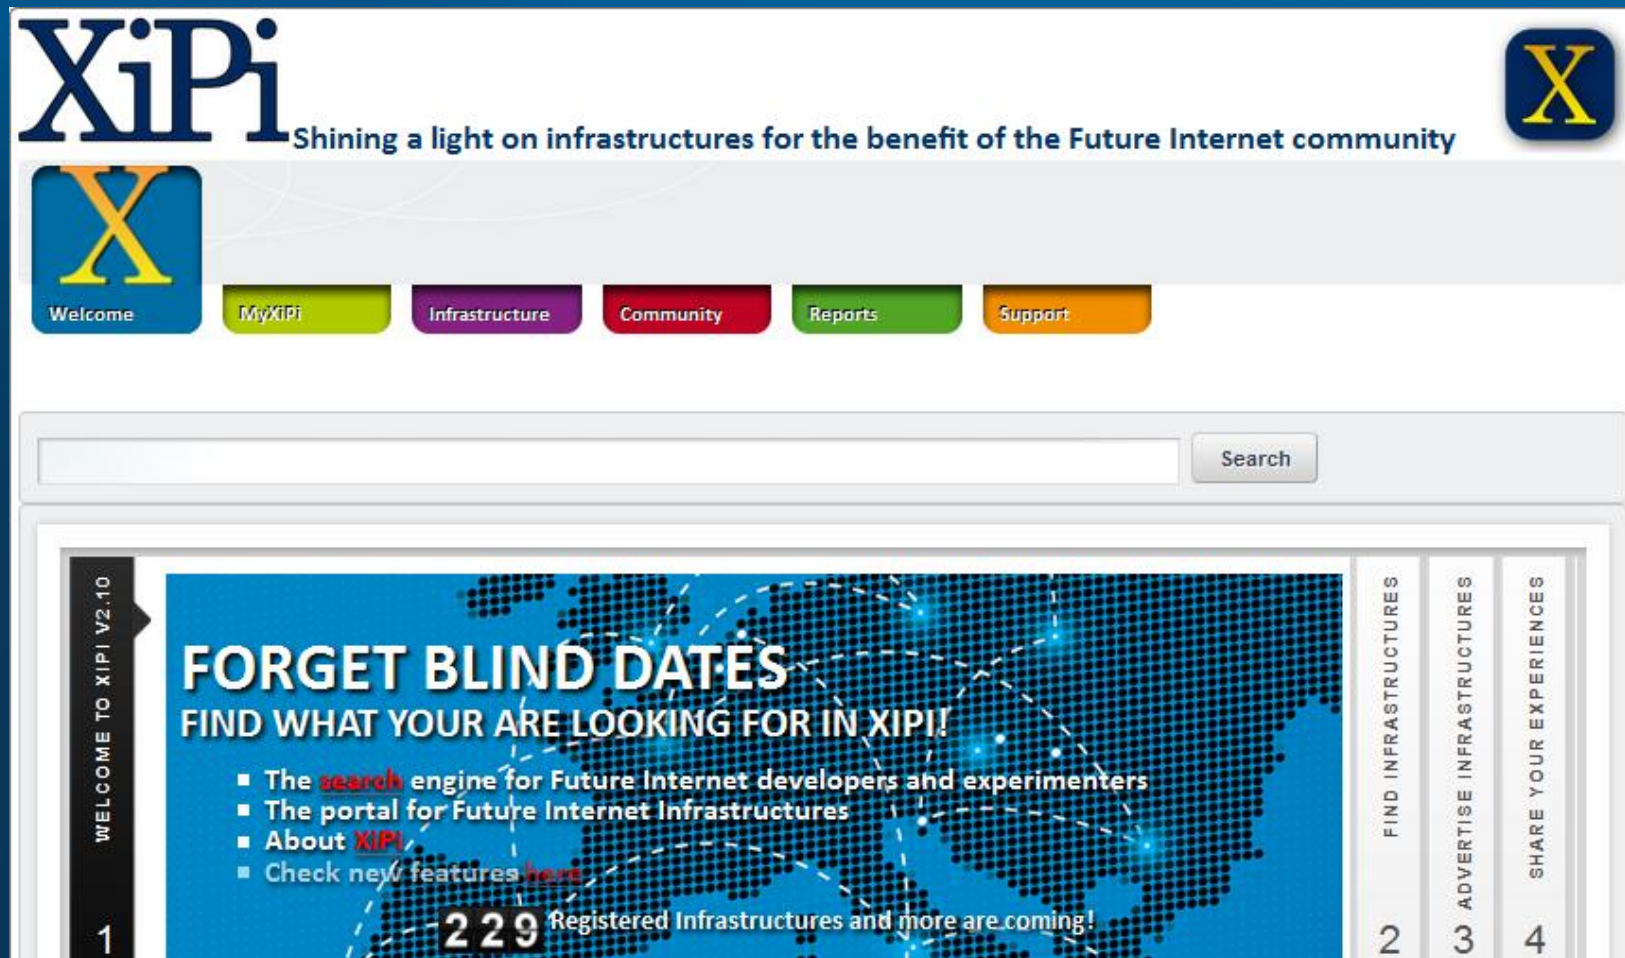

The three main outcomes of the INFINITY Project

The XiPi Portal	The Infrastructures Roadmap	The “Common Description Framework” (CDF)
<p>XiPi is a web repository for <i>eXperimental future Internet PPP and beyond Infrastructures</i>. It is the largest and more complete on-line catalogue of Future Internet infrastructures</p>	<p>The INFINITY Future Internet Roadmap is a document that investigates how Future Internet infrastructures need to evolve and become sustainable to allow developments to prosper</p>	<p>The CDF is a taxonomy for the description of ICT related infrastructures, so that the key characteristics of infrastructures can be captured in a consistent and structured way</p>
<p>www.xipi.eu</p>	<p>www.fi-infinity.eu</p>	

XiPi (www.xipi.eu)

There are currently ~230 infrastructures on XiPi and the repository is still expanding.

XiPi Shining a light on infrastructures for the benefit of the Future Internet community
