# Teaser

## *I-Deal-Grid, The New Electrical Distribution Architecture*

*The archetype of a true sustainable system  
So smart and so sure for users, installers and energy providers*

*It is time to change for people and the planet*

# Organisation Profile

## *EDISON WAYS*

*nearly 100 people involved in this project*

*They are convinced that we must move towards a better world*

*We work with:*

*FIDsud CDBA, IPSIDE, JURICA, VIVINNOV*

*We are supported by:*

*ADEME, AD'OCC, BPI France, CIC, Derbi, Euratechnologies Lille, French Tech, Hi-France, PEXE, Tenerrdis*

*We have been awarded by:*

*EDF énergie intelligente, PIA ADEME, Pôle Derbi Innovation 2017, VINCI energies, AD'OCC "coup de pouce"...*

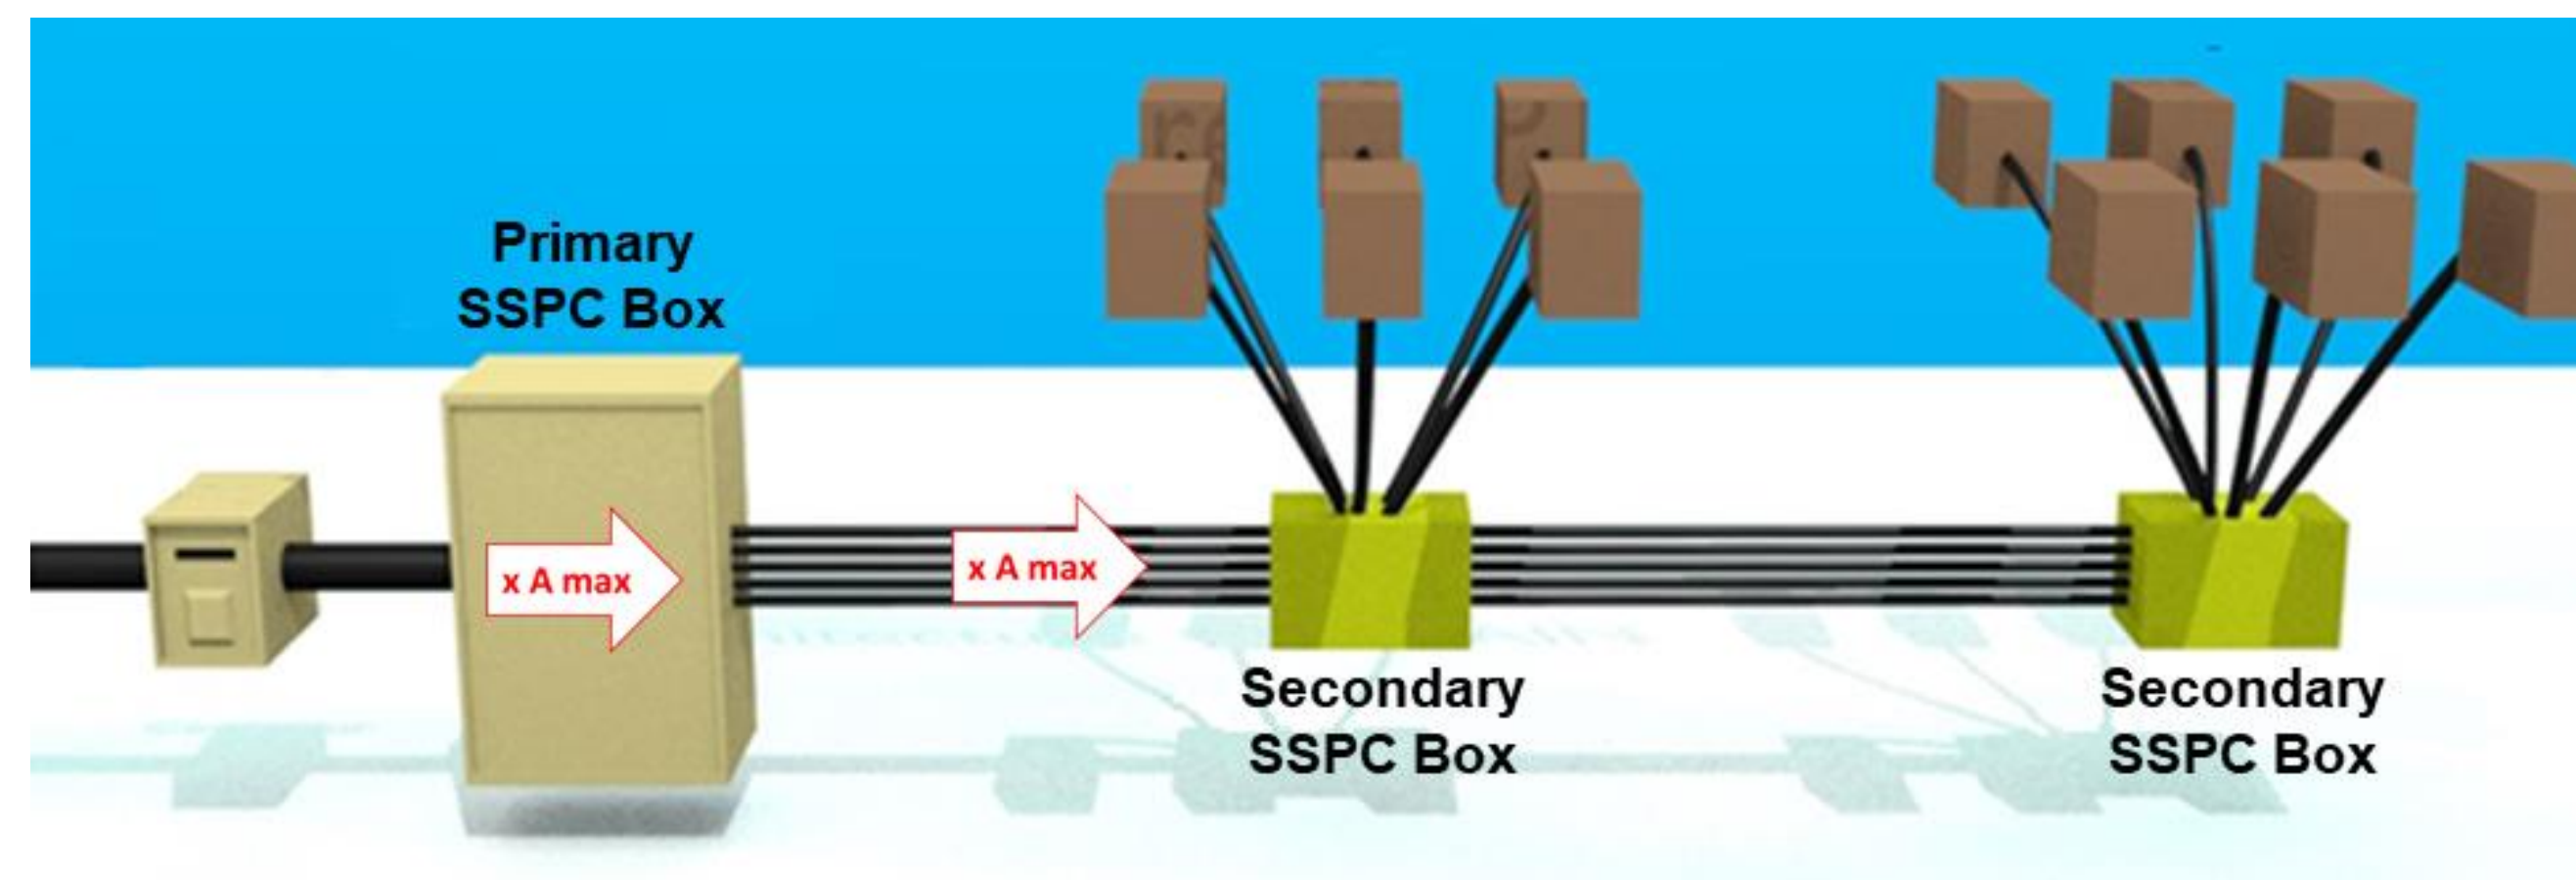

# Proposal Introduction

*To modify the electrical distribution architecture saves wiring (Copper = Weight)  
We divide by 5 or more the copper of the wiring.*

*No architecture has been as safe as ours. (neural concept)*

*The user can adapt the installation to his needs without modifying the wiring.*

# Proposal Introduction

*This architecture is universal. The main user of copper is electrical installation for homes, buildings and factories... It is our GOAL*  
*We need to achieve the TRL8 phase before the end of September*

# Partners

*We will achieve the TRL9 product in collaboration with electricians to comply with their needs. (partnership FFIE)*

*We have to redesign the user interface  
(partnership design expert ?)*

*We would like to produce specific components  
(partnership Infineon, ST micro..)*

*We would like to enhanced the data communications  
Partnership not defined (Lab..)*
