Oulu, Finland

- CHT's vision: Individuals to promote their health in a better way in their personal virtual intelligent environment
- **Connected Health** environment:
 - **Personalized, Predictive, Preventive, Participatory** health services
 - **Communication, Connection, Combination** of data streams
- Help & coordinate to create new innovations into new health projects

- **DHR** - Digital Health Revolution with MyData, Tekes
- **READi for Health** - Regional Digital eHealth Agenda

1. MyData in eHealth Cloud

- MyData is a human-centered approach to personal information management and processing.
- MyData integrated with health and care
 - All the data of person as Big Data
 - Not only health, even that is in our interest
- Integrate MyData and wellness as one
- Looking for Big Data integration and health care piloting cases.

Celtic-Plus

2. Hospital IoT and Location

- Integrated IoT and Location services
 - inside and outside hospitals as care service
- New location option 5G offers efficiency
- Emergency situations:
 - Abmulace arrives to hospital, care preparation
 - Situation (temperature, hart rate, feeling etc.)
 - Contact to specialists with care needs
- Care situations:
 - Patient location in hospital and between them
 - Communication to care everywhere
 - Patient situation (temp, hr, feeling, video etc.)
- Special equipment for care:
 - Moving of different devices in hospital needs located
 - Status of the equipment (battery, readiness, automatic start of device)
 - Devices attached to persons and beds when patient move
 - Rented or stolen devices to be located outside the hospital

Partners

- Hospitals for this proposal for piloting
- Entrepreneurs and SME's in this area
- Equipment manufacturers
- Location partners
- IoT partners
- Security experts
- Regulatory experts
- Patient data systems
- Research specialists for specs and requirements
