**CELTIC-NEXT eurogia 2020**  
 Next Generation Telecommunications for the Digital Society

## JOINT CALL 2020

Open until 30th of March

**SUBMIT YOUR PROPOSAL**

This is where the smart connected world and clean energy meet its efforts in pushing innovation forward to tackle better current global trends. We invite you to participate, engage and explore groundbreaking opportunities within and across both sectors.

### Eureka Clusters offer:

- industry driven network
- field-specific knowledge ecosystem
- project funding opportunities (60% success rate)
- coaching and monitoring
- flexible bottom up framework

### Who can participate?

- any type of businesses (SMEs or large enterprises)
- universities or research organizations

### CELTIC: next generation communications for the digital society

CELTIC-NEXT includes a wide scope of ICT topics based on new high-performance communications networks supporting data-rich applications and advanced services, both in the ICT sector and across all vertical sectors.

### Eurogia2020: clean energy and decarbonizing technology

The digital incorporation into the energy industry and services along its value chain is an indispensable part of energy transition, thus a priority for our cluster. We are looking to become the ultimate clean, intelligent and distributed energy ecosystem hub.
