

HIPERMED: High PERFORMANCE telemedicine platform
E3: Ehealth services Everywhere and for Everybody

CELTICplus Success Stories

Madrid 16th March 2016

Óscar Chabrera 

High
PERformance
teleMEDicine
Platform
CP7-007

Project overview

- ❖ Exploits and extends the results from the HDVIPER Celtic Project

- ❖ Designed and implemented an **OPEN HIgh PERFORMANCE teleMEDicine platform** based on a unified Service Oriented Architecture (SOA), providing media and control services over IP
- ❖ **Validated in 5 Healthcare Scenarios by patients, doctors and professors**
- ❖ **Currently under exploitation**

❖ **CELTICplus Award Silver 2014**

❖ **EUREKA ADDED VALUE
Award Winner 2014**

❖ **EUREKA INNOVATION
Award Winner 2014**

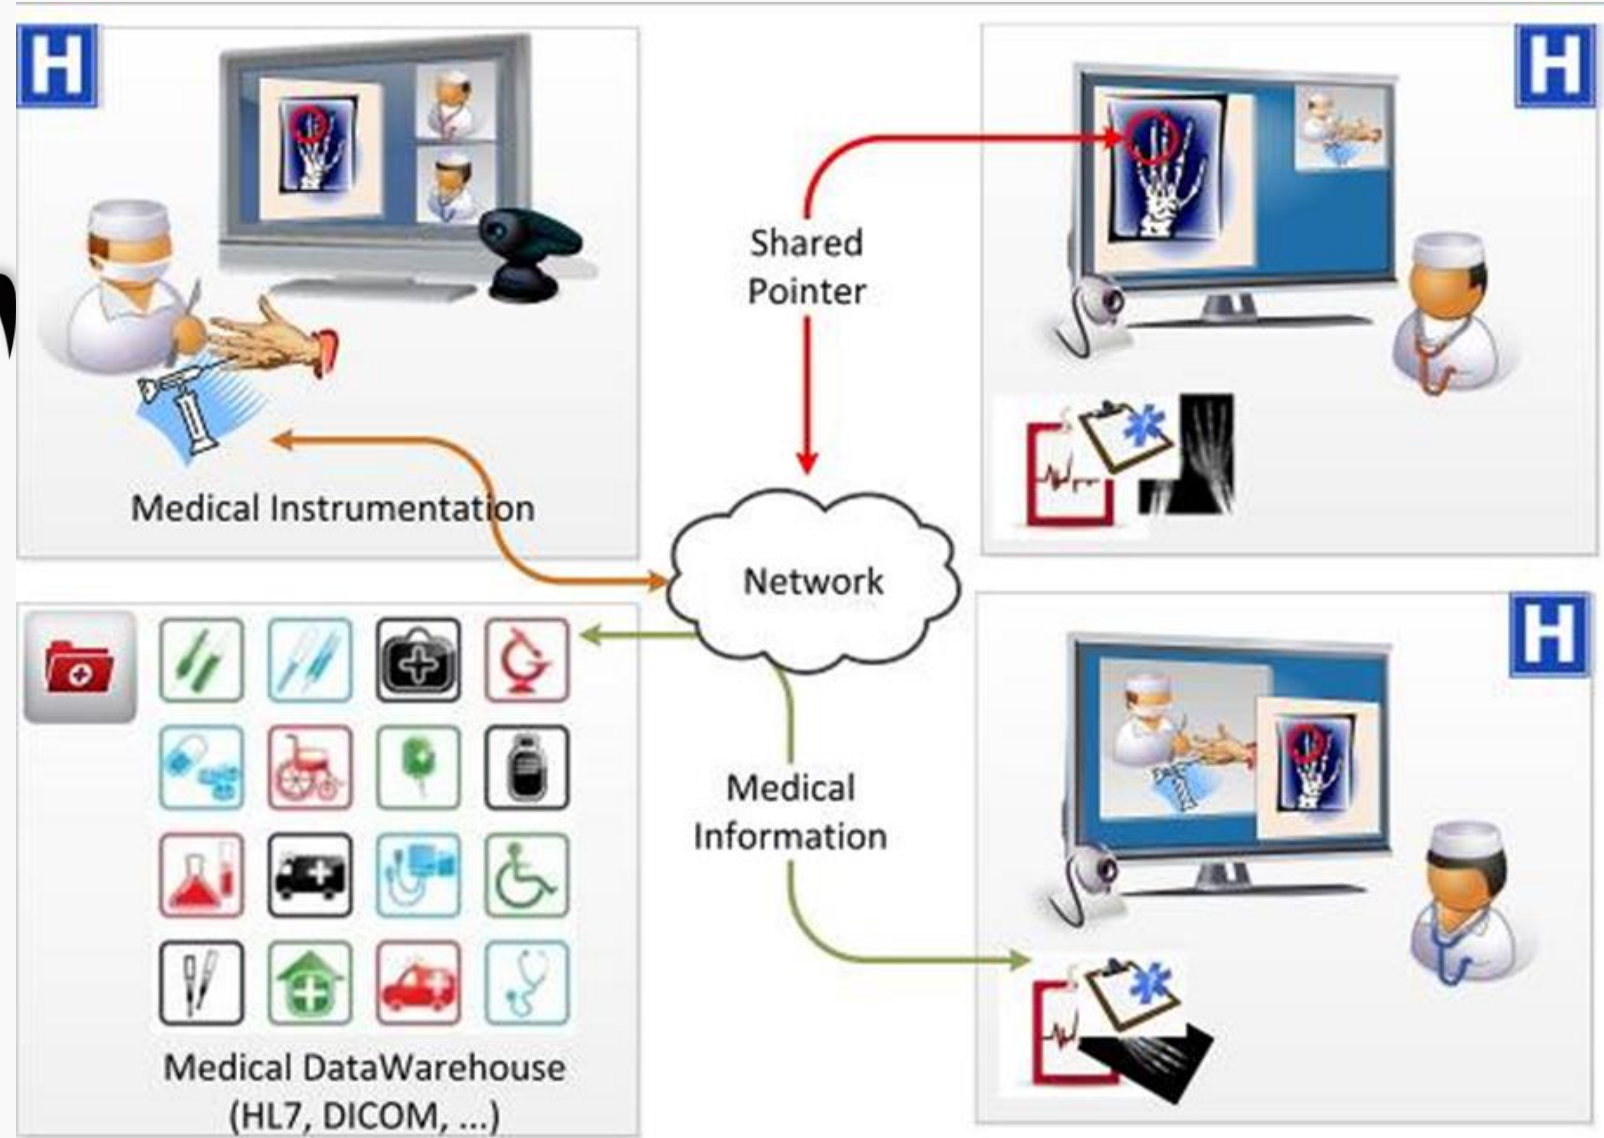

External Final Users Validation

In a Nutshell

E-health solutions for doctors: Remote Consultation

❖ Remote Lecture

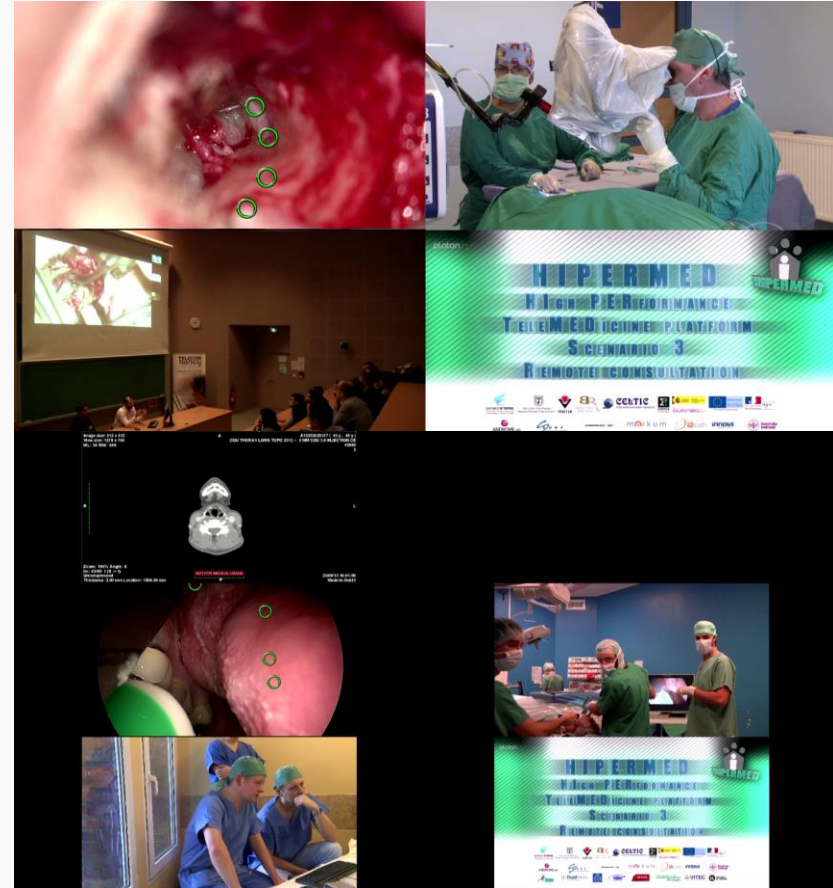

❖ Planned Consultation

❖ Emergency Consultation

❖ First ever Surgery

Hiperméd clearly appears **relevant, efficient and effective** for professional usages. Under deployment in Sweden, France, Poland and Spain

Video quality assessment: compression threshold

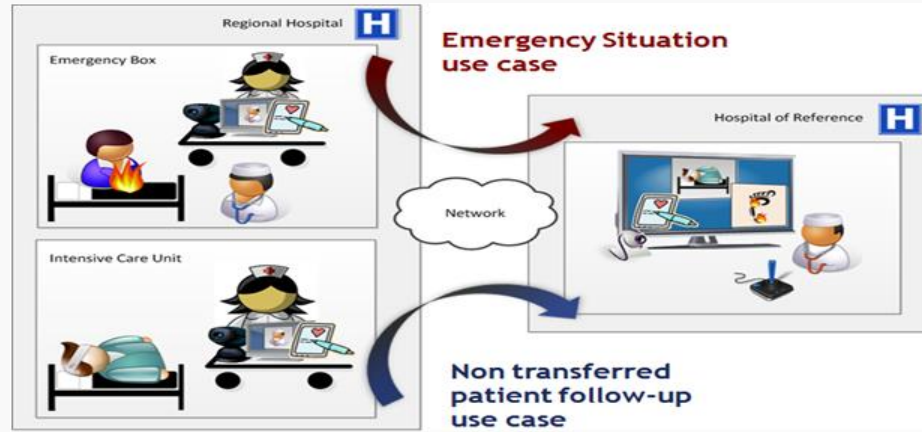

- ✓ ITU-BT.500-13 protocol for the **assessment of picture and video quality - double-stimulus continuous quality-scale (DSCQS)**
- ✓ **4 original ENT video test sequences at 3Gbits/s** (full HD resolution (1920x1080 – 60 Frames/s))
- ✓ **14 observers** with different ENT experiences in medical curriculum (intern, extern, resident, doctor, professor)
- ✓ **10 AVC/H.264 compression ratios**
- ✓ Comparison between **MOS** and **objective metrics**

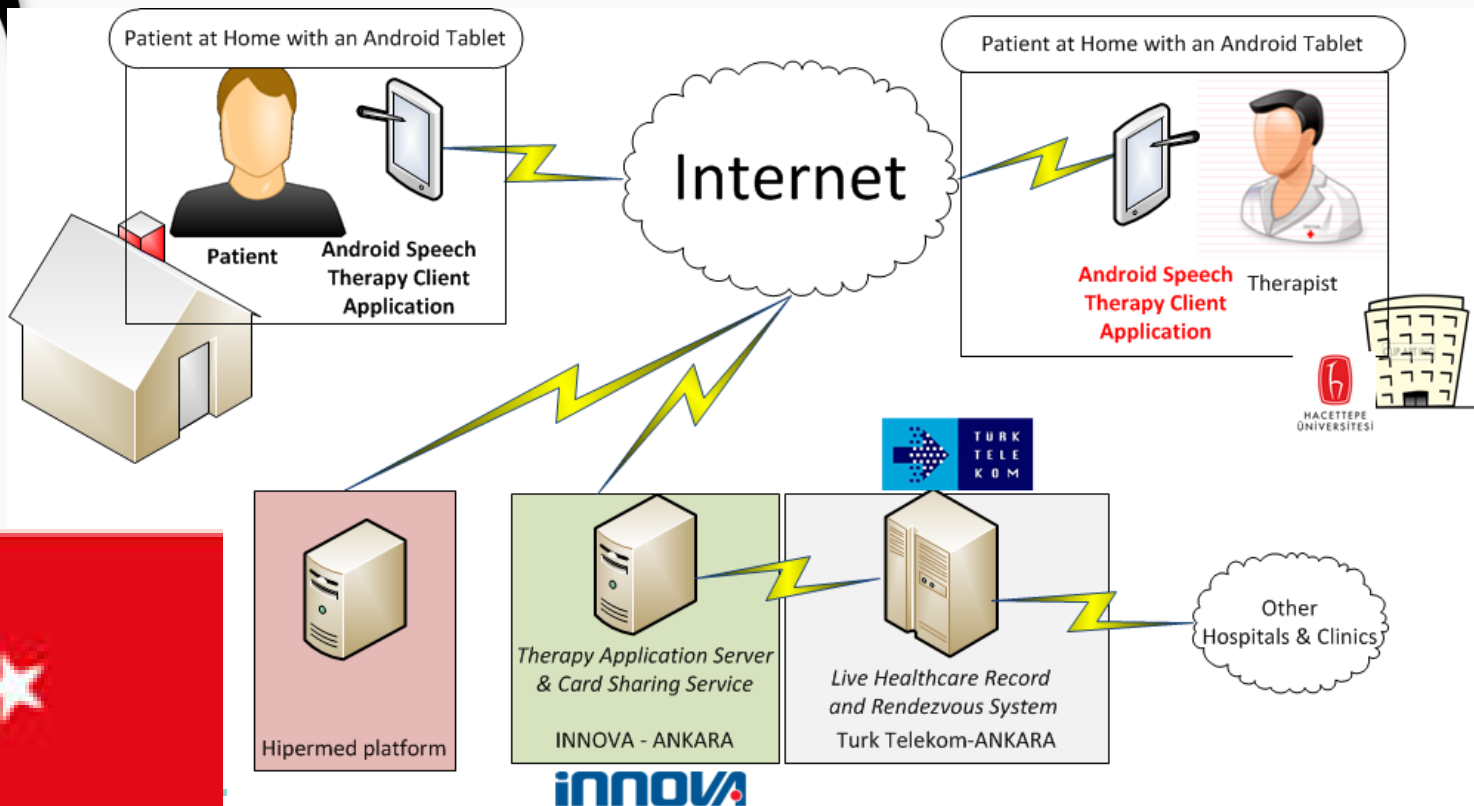

Thanks to **expertise in compression** and in **quality assessment** we keep safe the quality of ENT videos for medical usages **down to about 3Mbps**

E-health solutions for doctors: Tele Burn

E-health solutions for patients: Speech Therapy

- ◆ Number of appointments attended by the patient increased
- ◆ Therapy cost due to transportation for the patient has decreased considerably
- ◆ Time devoted for therapy session has decreased for both: patient & therapist

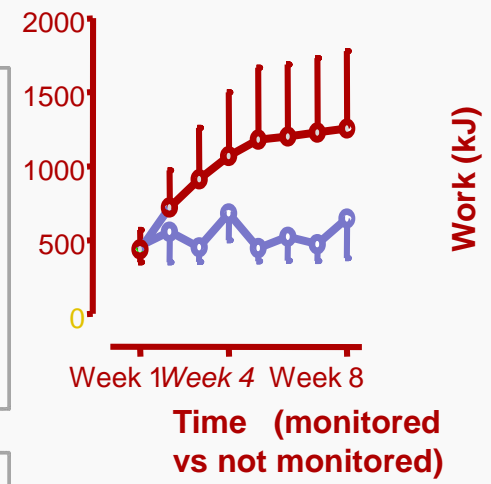

- ◆ Providing mobile videoconferencing to +10M people

E-health solutions for patients: Cardio

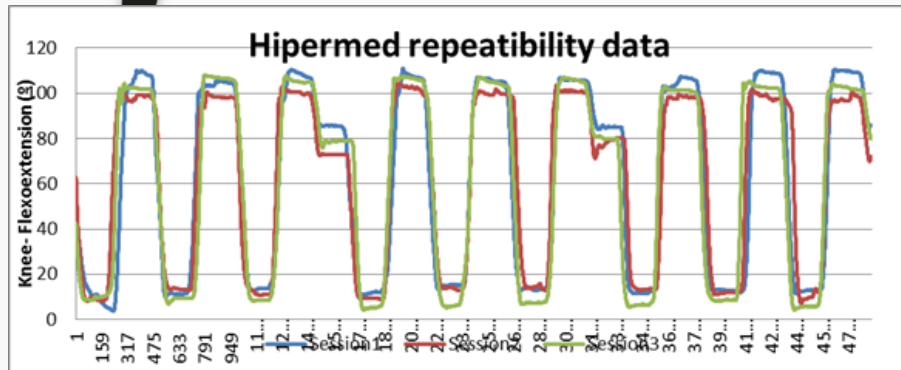

- ◆ Reduction in hospital admissions
- ◆ Improves patients quality of live and exercise tolerance

E-health solutions for patients: Rehabilitation

- ◆ 83% cost reduction
- ◆ 66% of patients prefer HIPERMED rehabilitation system vs conventional sessions

E-health services

Everywhere and for

Everybody

Project overview

- ❖ Project started December 2014
- ❖ Design & implement an **E2E Platform** able to allow Everybody access to **E-health services** Everywhere
- ❖ Exploits and extends the results from the HIPERMED Celtic project

Main Updates

- ❖ HIPERMED trusted in Doctors/Hospitals as External Validators. E3 is following this path.
- ❖ HIPERMED was working on High resolution and PERFORMANCE as well as allowing real time interactivity and HD-3D. E3 will add UHD-4K.
- ❖ HIPERMED was working on MPEG H.264. E3 moving to H.265
- ❖ HIPERMED lacked of mobility devices connection for the Professional to Professional High PERFORMANCE Scenarios
 - ◆ E3 Multisite connection aims to allow SD and HD connections simultaneously
 - ◆ E3 aims to allow doctors to connect from “Everywhere”: Smartphones & Tablets.
- ❖ HIPERMED lacked of High bandwidth requirements (4Mbps) for the Professional to Professional High PERFORMANCE Scenarios.
 - ◆ E3 has already reduced to 1Mbps
 - ◆ E3 is working in a multisite best effort connection

eVIA Innova Bronze Award

- ❖ First Award within the first year of Project: Nov 2015

Video quality assessment: compression threshold

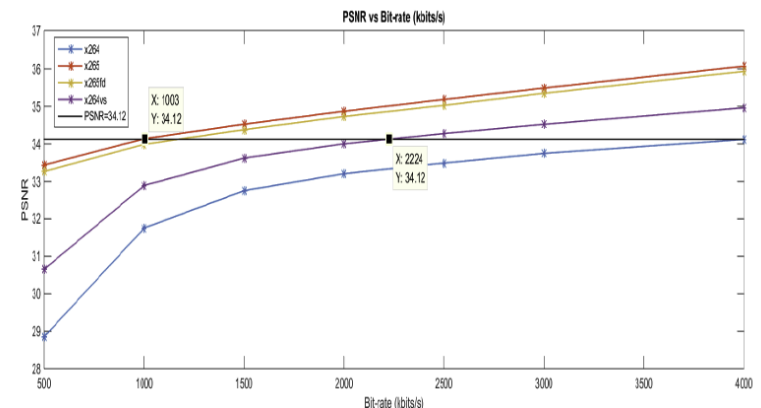

Thanks to **expertise in compression** and in **quality assessment** we keep safe the quality of ENT videos for medical usages **down from 4Mb/s to about 1Mb/s**

Streaming tests : Quality issue

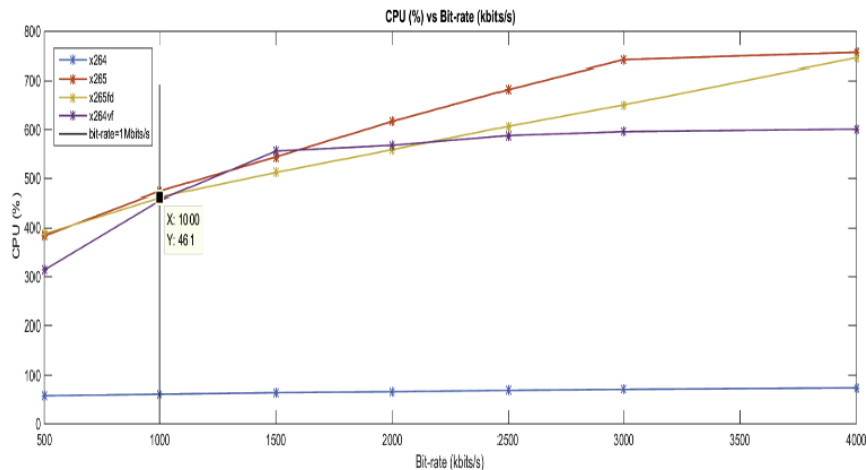

- X264 (bit-rate 4 Mb/s) → PSNR=33,39
- X265 (PSNR=33,39) → bit-rate=1Mb/s

Video quality assessment: Requirements

Streaming tests: CPU issue

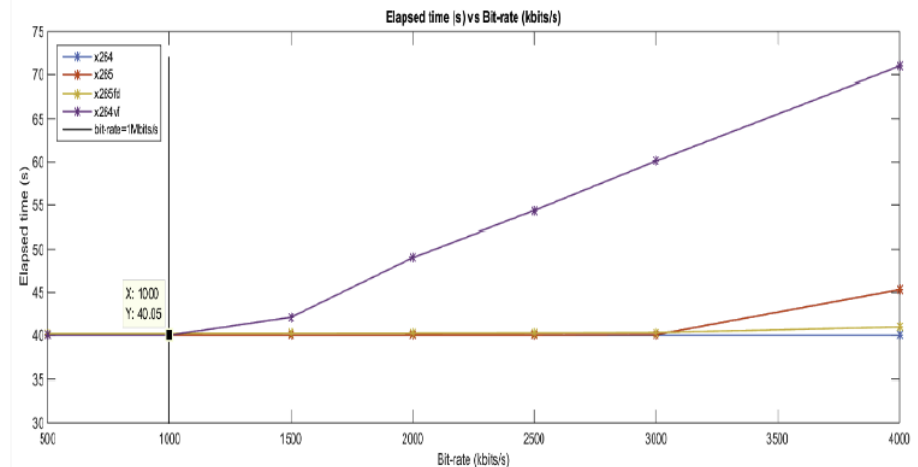

- CPU (%) vs Bit-rate (kbits/s)

Working to reduce CPU requirements as increase from single core to an Opto-core processor

Streaming tests: latency issue

- Elapsed time (s) vs Bit-rate (Latency):

Working to reduce processing overhead as H264 has no latency for 40 sec videos

Working to allow asymmetric connections allowing SD and HD videoconference simultaneously

KPI (Key Performance Indicators)

❖ Project Results Protection

- ❖ # Patents, trademarks, registered design, etc.:
- ❖ # Contributions to standards: **1 HEVC**
- ❖ # Standards followed: **Following HIPERMED defined standards: Medical and Video**
- ❖ # Master/PhD thesis contributing to/using project results: **1 VITEC-UL**

❖ Project Dissemination

- ❖ # Prototypes/Field Trials: **1 PROMETEE HIPERMED-E3 lab in Nancy (France) fully operational in June 2015. Formal inauguration on 29th Sept.**
- ❖ # Medical Congress: **1 Nancy (France) 29th Sept 2015 First 3D telesurgery transmission of ENT and Heart Surgeries. Working to have one in Espoo-Finland on June 15th MTR**
- ❖ # Journal Publications: : **10**
- ❖ # Conference & Papers:
- ❖ # Dissemination Events: **4 in 2014 Before project Kick off, 7 in 2015 together with HIPERMED project, 2 in 2016 together with HIPERMED project: 3 booths in MWC2016**

❖ Project Exploitation

- ❖ # new products/services:
- ❖ # Improved products/services: **1 NETICTEC/PSNC-UL improved HIPERMED Telco equipment**
- ❖ Sales: **1 NETICTEC/PSNC-UL sold 1st equipment to NANCY School of Surgery. 5 more deployed in Nancy Region Hospitals.**
- ❖ Expected RoI (Return on Investment):
- ❖ # new companies created: **1 NETICTEC**

❖ Project Impact

- ❖ Technoeconomics:
- ❖ # new permanent employees hired for project R&D: **10**
- ❖ # new permanent employees hired for project exploitation: **2**

Exploitation Activities

- 
- ❖ E3 partners work on HIPERMED project exploitation as this will help us to cash in the investment as well as to improve E3 project requirements and HIPERMED platform.
 - ❖ HIPERMED project products have to be adapted to specific patients/doctors needs
 - ❖ Deployed E3 improvements in Nancy School of Surgery
 - ❖ Deployed a first Demonstrator in Nancy (France) in PROMETEE lab fully operational in June 2015
 - ❖ Working to standardize this solution in France and replicate in the other project country partners: Spain, Turkey, Finland, Sweden and Poland.

E3 PROJECT
