

CELTIC-NEXT Launch Event

9th of December 2022, Online via WebEx

Pitch of the Project Proposal

ViMADE - VR in MAachine DEsign

Damian Batiuk, Comatec Poland
damian.batiuk@comatecgroup.pl

Teaser

ViMADE - Virtual Reality in machine design.

VR is new, yet mature technology so our aim is to pilot solutions that are both innovative and highly practical.

***Our mission** is to propose how to solve in unique yet practical way selected industry problems using VR. VR can help machine design to go beyond pen and paper CAD prototyping.*

***Our vision for the project** is to make machine design 3D experience for both our engineers and our customer and make the industry more efficient, user-friendly and safe.*

Organisation Profile

Comatec Poland is an international engineering office and part of international group.

Comatec Poland employs 100 engineers and have been operating on the local and European market since 2009.

We are providing professional services, including all aspects of design, engineering and consultancy.

Proposal Introduction

ViMADE - Virtual Reality in machine design.

VR is new, yet mature technology so our aim is to pilot solutions that are both innovative and highly practical. Solutions to be selected with active participation of the consortium members.

Aim of the project is to propose future industry solution to make machine design 3D experience for both our engineers and our customer and make the industry more efficient, user-friendly and safe.
