Pitch of the Project Proposal Digital Interface for Business

Guillaume Tardiveau – Orange Labs
guillaume.tardiveau@orange.com

Main Benefit

Digital Interface Framework for Business will enable businesses to contract:

- instantaneously and legally
- using a predefined digital framework.

Orange is a digital operator present in over 30 countries in Europe, Middle East and Africa.

-> for more information visit Orange.com

In the B2B area, contracting is today

- a long and costly process,
- involving numerous actors both from business and legal sides.

A legal and technical framework could be established to enable instantaneous digital contracts.

This would open the door to:

1. more B2B activity at european level
2. real time hybrid services using services of various partners: telecom, insurance, real-estate, ...
3. quick start contracting, limited in time, value and liabilities.

Project expected outcomes

1. a legal framework valid at European level
2. a Celtic technical governance
3. a technical framework establishing the approved protocols of digital contracts
4. Platforms of transactions inventory

Expected Partners

We are expecting partners as follows:

- 1- European digital law firm
- 2- Organizations representing market sectors
- 3- Industrial partners
- 4- European blockchain partner
