CELTIC-NEXT
Project Proposal Pitch

13th of March, Online

Real Trusted Systems

Ian Oliver, University of Jyväskylä
ian.j.oliver@jyu.fi

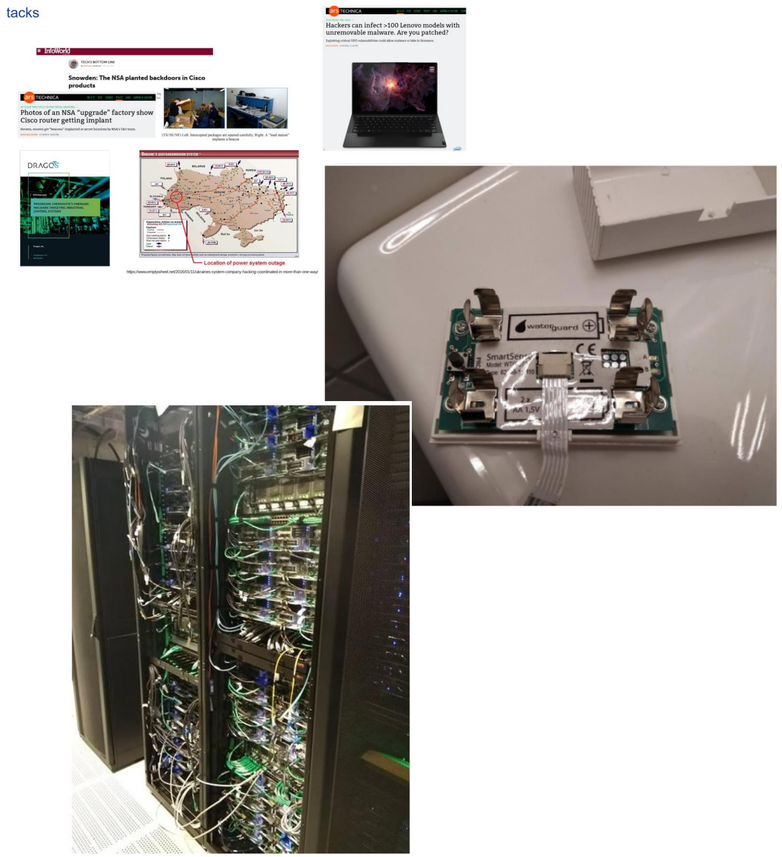
Teaser

- An end-to-end, top-to-bottom trusted and confidential cloud and edge computing platform to provide the trustworthy part to your trustworthiness requirements.
- Now you can truly say "Trustworthy AI"

Organisation Profile

- The **University of Jyväskylä** is a research university in Jyväskylä, Finland.
- 14,000 students,
- 2,800 staff
- 222 Meur funding (2023)
- The faculty of IT is a multidisciplinary information technology specialist and one of the two largest university-level providers of IT education in Finland.
- The IT Faculty is engaged in active international cooperation both in the field of research and in teaching.

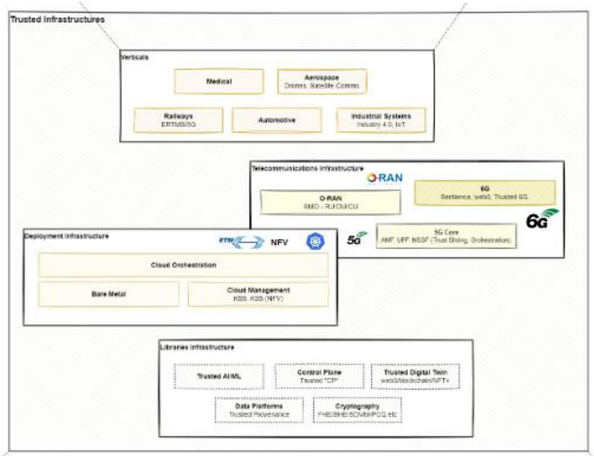
Proposal Introduction



Highlight #5:
Trusted Railway Signalling POC
- Trust in Low Latency Environments
- Trusted Hardware
- Trusted Control Plane
- Dynamic Environment
- Secure App Design Learnings
- FMEA and RCA for Trust
- Security & Trust Processes

Trustworthy X

X = AI/ML/Edge/...



VNFs, VM Images, Containers, Clouds, Core, Edge, MEC, IoT, Sensors

Attestable? **Trustable?**

Devices, Infrastructure, Applications

Threats:
Supply-Chain, Run-Time, Processing

Verticals and Domains:
Secure, Trusted and Confidential hardware and data processing

Attest all the things:
Hardare, Containers, Supply-Chain Digitial Forensics and Trusted Infrastructure

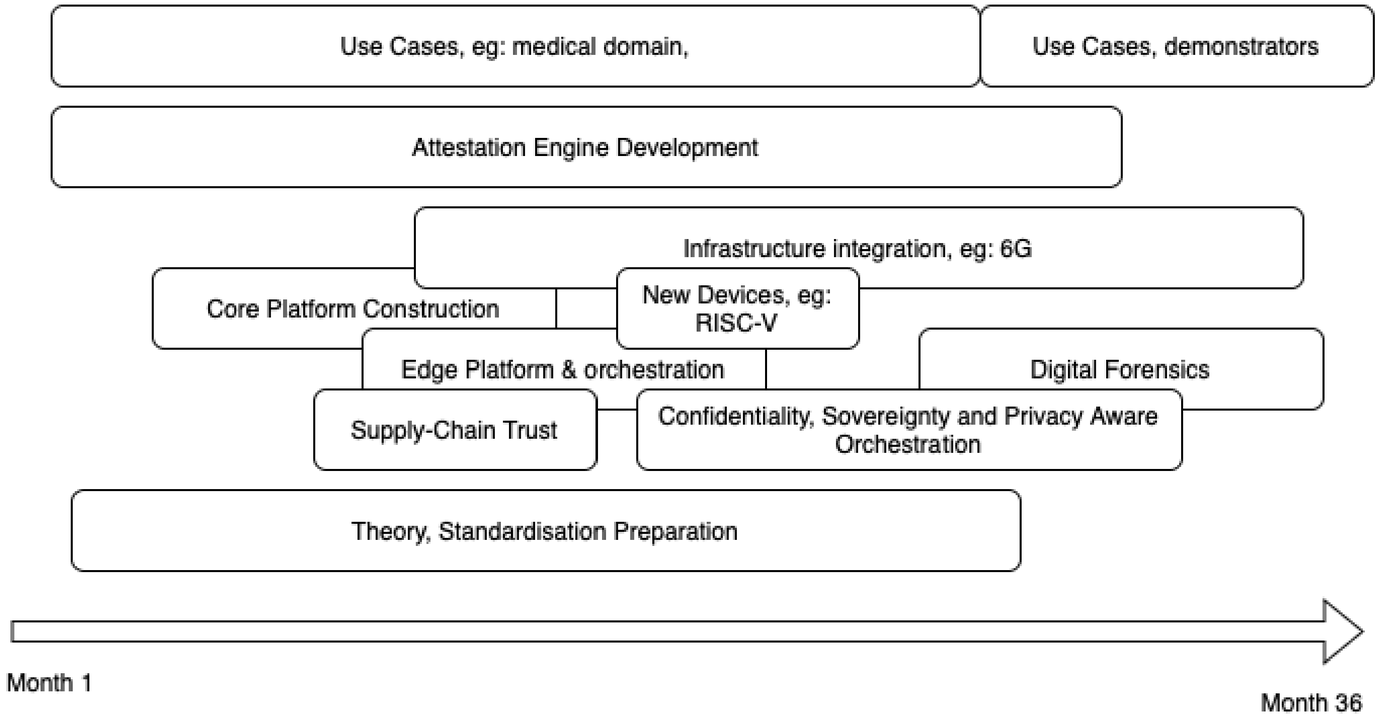
Proposal Introduction

Outcome

- Core, Edge, FarEdge to Device Confidential Computing
- Generic Attestation from Supply-Chain to Run-Time
- Orchestration for trusted workload mobility
- Digital Forensics for failure analysis and prevention

Impact

- Platform for trutly trustworthy systems
- Privacy, Confidentiality, Sovereignty
- Input to standardisation, eg: 6G via IETF, ETSI, GSMA etc



Partners

We are looking for:

- IoT Hardware Providers, Service Providers (AI/ML in the cloud), anyone requiring data processing of sensitive or critical data, Cloud management/providers
- Medical, automotive data processing (good case study), Satellite/Critical Communications/Edge Technologies, or, anyone with strict confidentiality, privacy and sovereignty requirements for their data processing and collection, even safety-critical systems

Contact Info
