

TRENDY

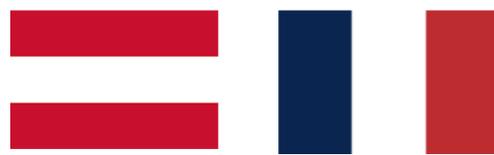

Trusted Industrial AI in Networked Industrial Systems

- DevSecMLOps framework and intelligent application-aware network management for reliable, explainable, and secured cognitive AI enabled services
- Distributed edge native AI models facilitating flexible orchestration and efficiency

Key Benefits

- Compliance by design edge-cloud capable AI services
- Reduced Operational Costs and improved overall quality – performance → Lower downtime, Higher throughput, Reduced manual intervention and rework

Countries

Unnamed Finnish companies

On Aalto University

Has strategic positioning in Celtic-Next key topics

- Part of EU AI Factory initiative LUMI
- Part of Finnish AI Region (FAIR) European Digital Innovation Hub
- Maintain Finnish Quantum Computing Infrastructure (FIQCI)
- Part of 6G Test Network Finland
