

**CELTIC-NEXT**

# **Proposers Brokerage Day**

30<sup>th</sup> January 2026, Vienna

**Pitch of the Project Proposal**

**Trustworthy Agentic AI-powered Communications  
for Autonomous Robotics Applications (TRACA)**

**aun<sub>o</sub>a**

**Teo Redondo, Head of Innovation, AUNOA**  
***tredondo@aunoa.ai***

# TRACA:

## Trustworthy Agentic AI-powered Communications for Autonomous Robotics Applications

*Combining disparate technologies with European-owned models (EU technological sovereignty) and applying extended realities to different use cases, with a special focus on communications from different media/data sources.*

\*This image was generated with the assistance of AI

# Key Focus Areas

- *Pushing Agentic AI* (independent and autonomous, working separately or in an orchestrated way)
- *Quantum communications* (with QKD, or other alternatives)
- *Building and training specific-domain models* (multimodal: text, voice, graphics, Vision-Language-Action (VLA)...) )
- *Pushing XR (eXtended Realities) tools and software*, as another communication means (these could be related to navigation in a Digital Twin – Agro, Healthcare, Emergency situations, and so on), as the basis for AI-powered Robotics and "contextual computing" (this area of work is getting attention from Meta and Google)
- *Smart Grid Monitoring with AI-based cybersecurity*

# Use Cases

## ***Education***

pervasive learning, immersive simulation environments (3D spaces, contextual computing, ...)  
- sustainable communication infrastructure / massive virtual environments (XR)

## ***Scientific Research datasets repository***

FAIR principles: ingest and exploration  
– beyond communication constraints

## ***Healthcare***

XR-based telemedicine (deliver immersive, real-time healthcare services) using Quantum comms - QKD

## ***Smart agriculture (agroecology)***

sensor data (EO, satellite and land), drone (aerial, terrestrial, aquatic) / visualization with Augmented Reality

## ***Environmental monitoring (ecoresilience)***

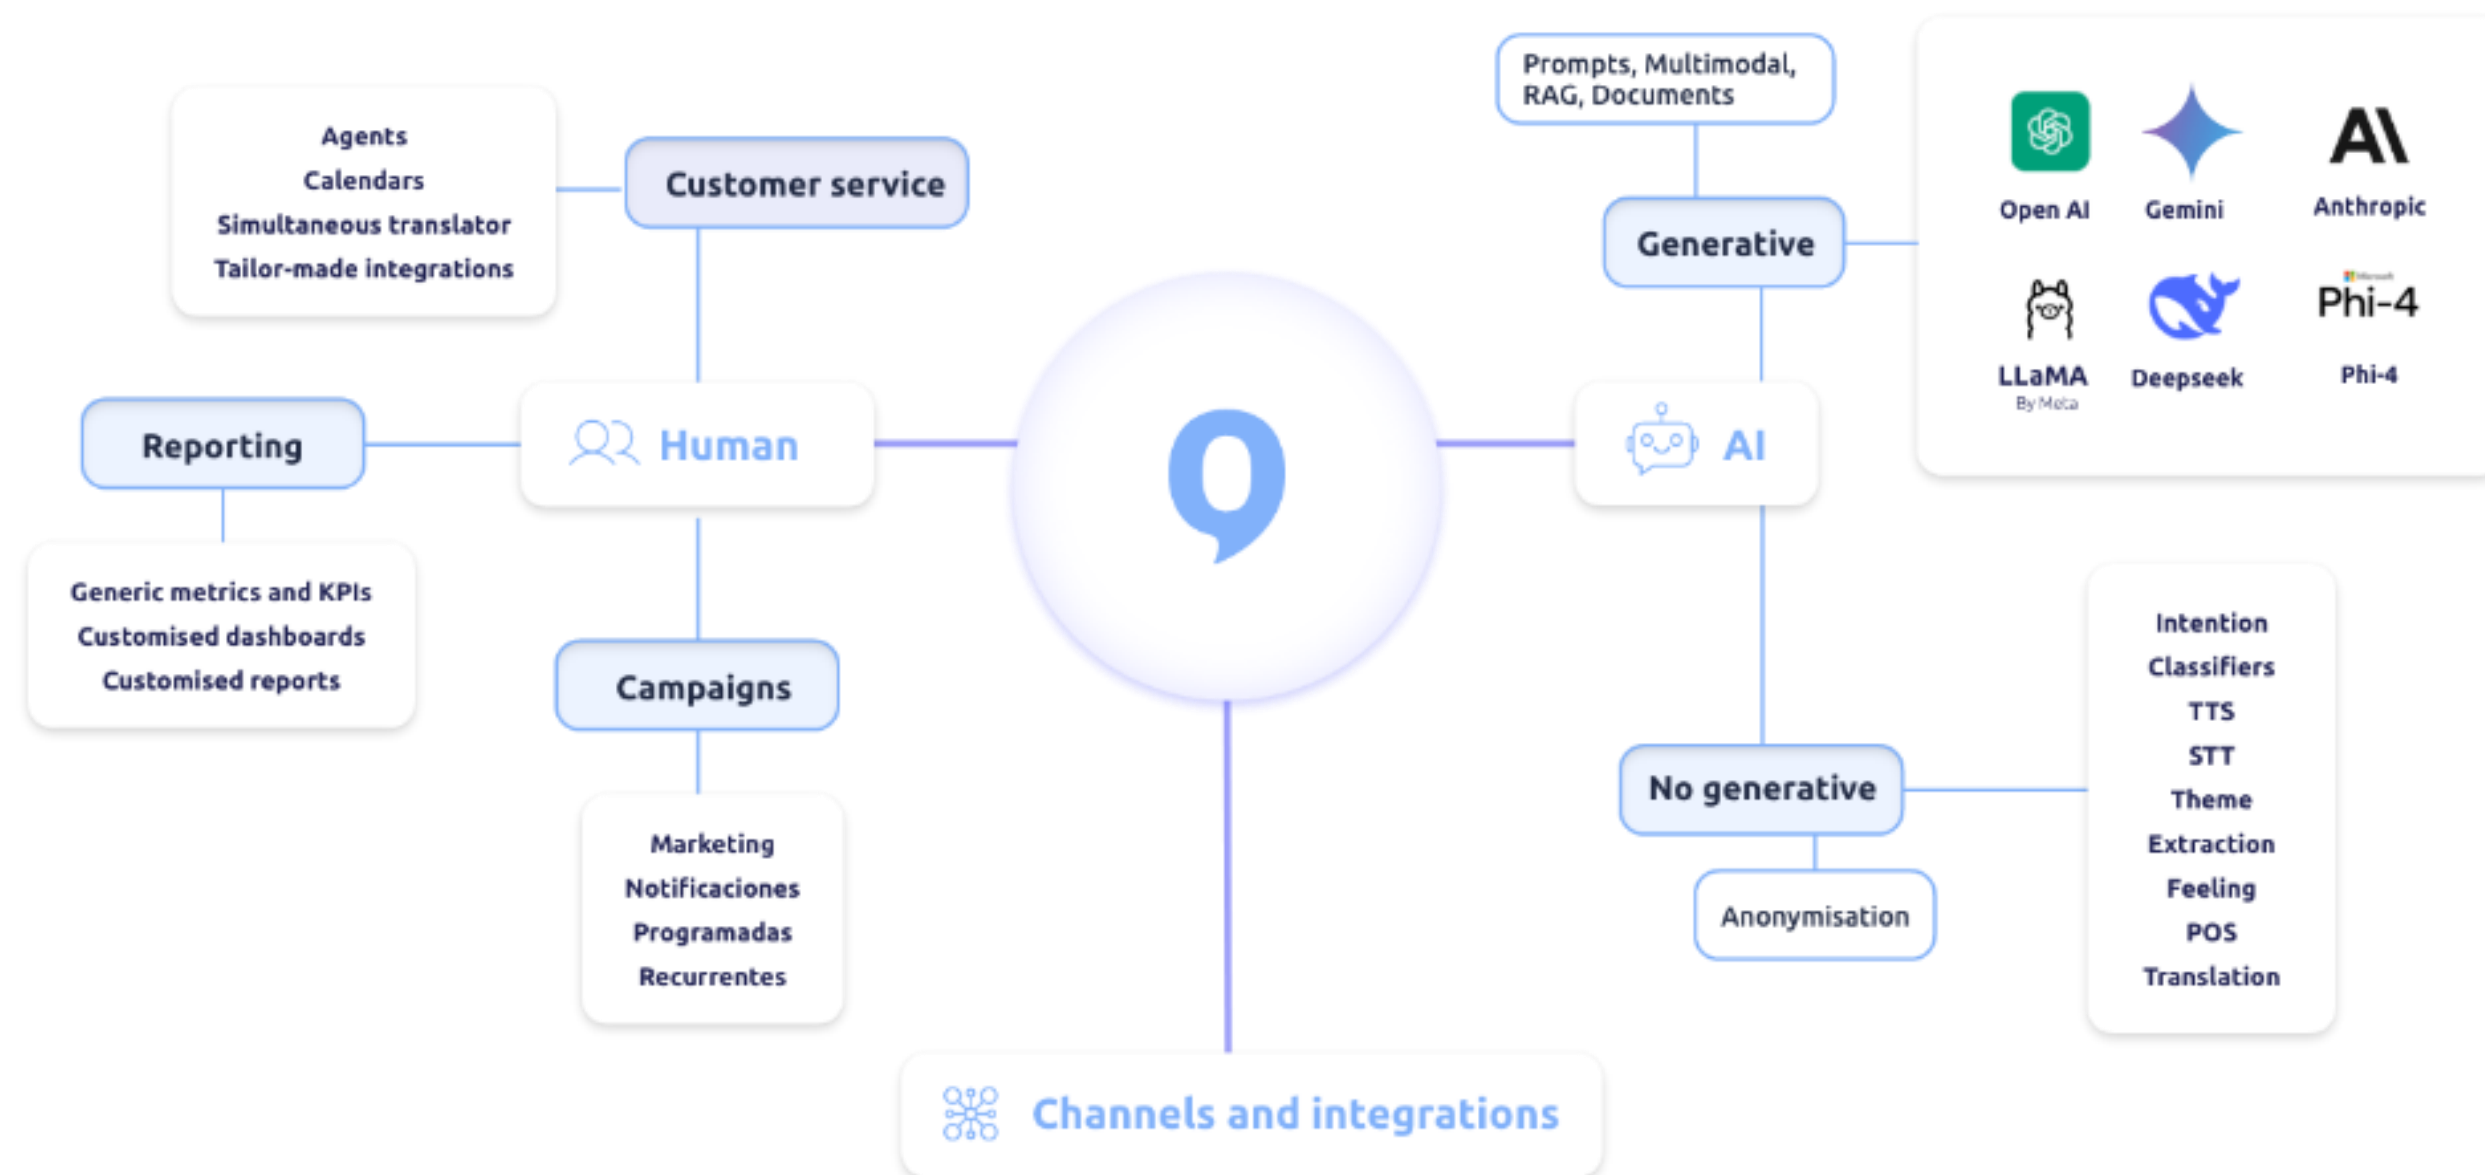

emergency situations (flooding, fires, coastal situations, ...), management: early warning, climate resilience and sustainable bio-economy value chains

# Who we are

# aunoa

## Cutting-edge AI Agents platform

**dfki**  
ai  
Deutsches Forschungszentrum  
für Künstliche Intelligenz  
German Research Center for  
Artificial Intelligence

## The World's Largest Public AI Research Center

55 Professors  
26 Research Departments  
>600 Researcher from 83 countries  
+ ~1000 German colleagues  
>100 Startups and Spin-Off companies  
Project Budget 2023 ~260 Million €

262 Professors +  
34 Junior Professors  
17.000 Students  
1.800 PhD Students  
85 Bachelor degree programs  
104 Master degree programs  
28 Distance learning programs
