

CELTIC-NEXT

Proposers Brokerage Day

30th January 2026, Vienna

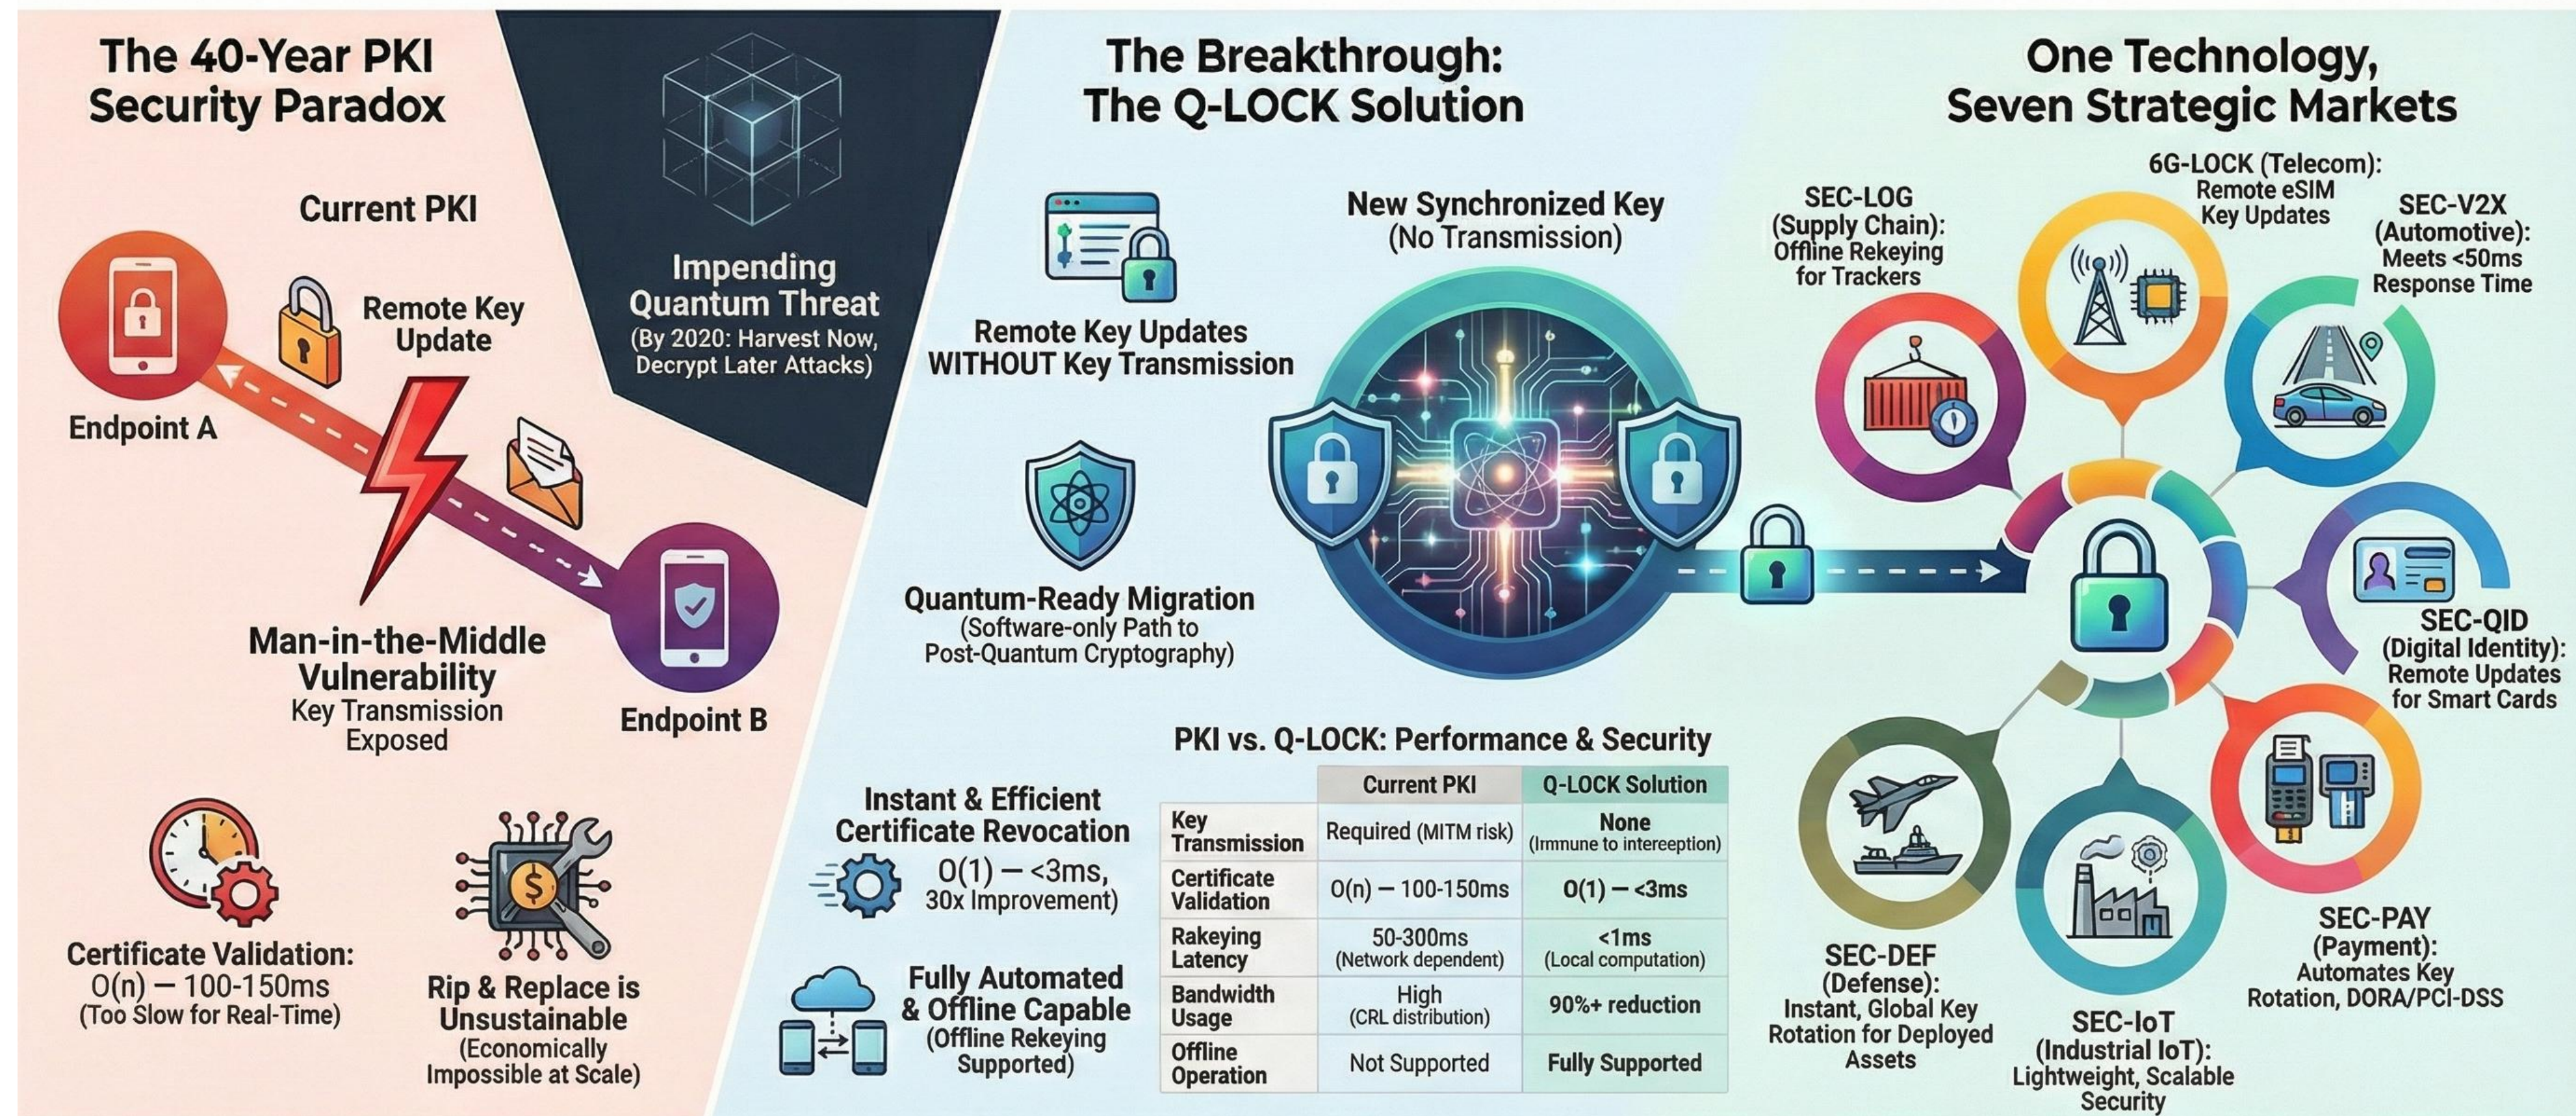

Pitch of the Project Proposal

Q-LOCK: Remote Key & Certificate Management Without Key Transmission

Dr. Uğur CORUH
ugur.coruh@coruh.com.tr

Q-LOCK: Solving the 40-Year Security Paradox

Ready for Deployment:
Join the Q-LOCK Consortium

Technology Readiness: TRL 8
(Complete, Qualified, Ready for Deployment)

Seeking Partners Across All Eureka Countries
(Telecom, Auto, Finance, Govt, IoT, Research Institutes)

Patented & Protected Innovation:
Technology is protected by international patents WO2024162915 and WO2024162916...

The Problem

40 Years of PKI Limitation

THE SECURITY PARADOX

To update a key remotely, you must TRANSMIT the key — exposing it to interception.

CURRENT LIMITATIONS

- Security vulnerability during transmission
- Dependency on secure channels
- Manual processes required
- Cannot scale to billions of devices

⚠️ QUANTUM THREAT

Quantum computers will break RSA/ECC by 2030

URGENT CHALLENGES

- "Harvest now, decrypt later" attacks
- NIST PQC standards finalized 2024
- Billions need algorithm transition
- "Rip & replace" economically impossible

2030

Quantum Deadline

Organization Profile

Deep-Tech R&D Company

FINTECH

- EMV KERNELS, ANALYZER, SOFTPOS, SCRIPTING

TELCO

- CARD APPLETS, CORE NETWORK, OTA OPERATIONS, RFM/RAM

IOT

- FIRMWARE DEVELOPMENT, DIGITALTWIN

CYBER

- APPLICATION SECURITY, TAMPER-PROOF APPS. DEV.
- CRYPTOLOGY, SECURE COMM. SECURE DATA STORAGE

V2X

- ITS/C-ITS PROTOCOL DESIGN AND IMPLEMENTATION

MEDICAL

- DEVICE AND PLATFORM DESIGN AND DEVELOPMENT

KURUMSAL FİRMALAR EKOSİSTEM BİLGİ BANKASI BASIN İLETİŞİM [Angeportal Giriş](#) [Başvuru Yap](#) TR

Remote Key Update WITHOUT Key Transmission

Mathematically proven secure • Patent protected • SDK Available

REMOTE KEY UPDATE

Asymmetric keys updated without transmission

ENHANCED CRL

Improved certificate revocation control

CERTIFICATE RENEWAL

Remote renewal preserving key secrecy

QUANTUM MIGRATION

Legacy systems → PQC without hardware change

ZERO MANUAL

Fully automated key lifecycle management

EXISTING INFRA

Software-only deployment

Universal Security Enabler — Works with ANY PKI-based system

Seven Application Domains

One Core Technology • Multiple Markets

6G-LOCK

Telecom

6G/B5G Security

3GPP, ETSI

SEC-V2X

Automotive

Connected Vehicles

ETSI, SAE

SEC-QID

Identity

eID & Wallets

eIDAS 2.0

SEC-PAY

Payment

Card & Fintech

EMV, PCI

SEC-IoT

IoT

Billions of Devices

IEC 62443

SEC-DEF

Defense

Critical Infra

NATO

SEC-LOG

Supply Chain

Multimodal Logistics

ISO 28000

Target Partners: Telecom • Automotive • Finance • Government • IoT • Defense • Logistics

INTERNATIONAL PATENTS

WO2024162915

WO2024162916

TÜBİTAK FUNDED + SDK DEVELOPED

- ✓ SDK developed and tested
- ✓ System qualified in operational environment
- ✓ Ready for deployment

NATIONAL PHASE PENDING

US USA EU EU CN China

TECHNOLOGY READINESS: TRL 8

System complete and qualified

READY FOR COMMERCIAL DEPLOYMENT & PILOT PROJECTS

Partner Value Proposition

What Q-LOCK Brings to Your Products

INSTANT UPGRADE

Quantum-safe security without redesign

ZERO MANUAL OPS

Automated key lifecycle

FUTURE-PROOF

Algorithm agility

COMPLIANCE

NIS2, DORA, eIDAS 2.0

COST REDUCTION

No hardware changes needed

DIFFERENTIATION

Competitive edge

Q-LOCK transforms ANY product into a quantum-safe, zero-touch solution

Seeking Consortium Partners

Join the Q-LOCK Ecosystem

TELECOM

Operators, 6G vendors

AUTOMOTIVE

OEMs, Tier-1, C-ITS

FINANCE

Banks, payment networks

GOVERNMENT

ID agencies, CERTs

IoT

Industrial, smart city

DEFENSE

Contractors, agencies

LOGISTICS

Ports, carriers, customs

RESEARCH

Universities, institutes

OPEN FOR ALL EUREKA COUNTRIES

EU • Turkey • UK • Switzerland • Korea • Canada

Let's Talk! →

Contact Info

For more information and for interest to participate please contact:

Dr. Uğur CORUH / CORUH R&D
