

GUARD

Generative Unified Anomaly Resolution & Diagnostics

AI-driven service resilience for telecom and OTT infrastructures

Digiturk leads the consortium • Telecom operator sought for a cross-country pilot

Problem

Fragmented cross-domain observability
Slow, manual root-cause analysis
Peak-event capacity and QoE risks

Partners we are looking for

Telecom operator and pilot owner
AI / AIOps and platform providers
Research and benchmarking partners
Cybersecurity and standards partners

GUARD brings

Event-aware risk forecasting
Evidence-linked root-cause analysis
Policy-controlled actions with human approval

Why join GUARD?

Confirmed Digiturk OTT pilot
Cross-country validation against pilot baselines
Modular results with partner-led exploitation
