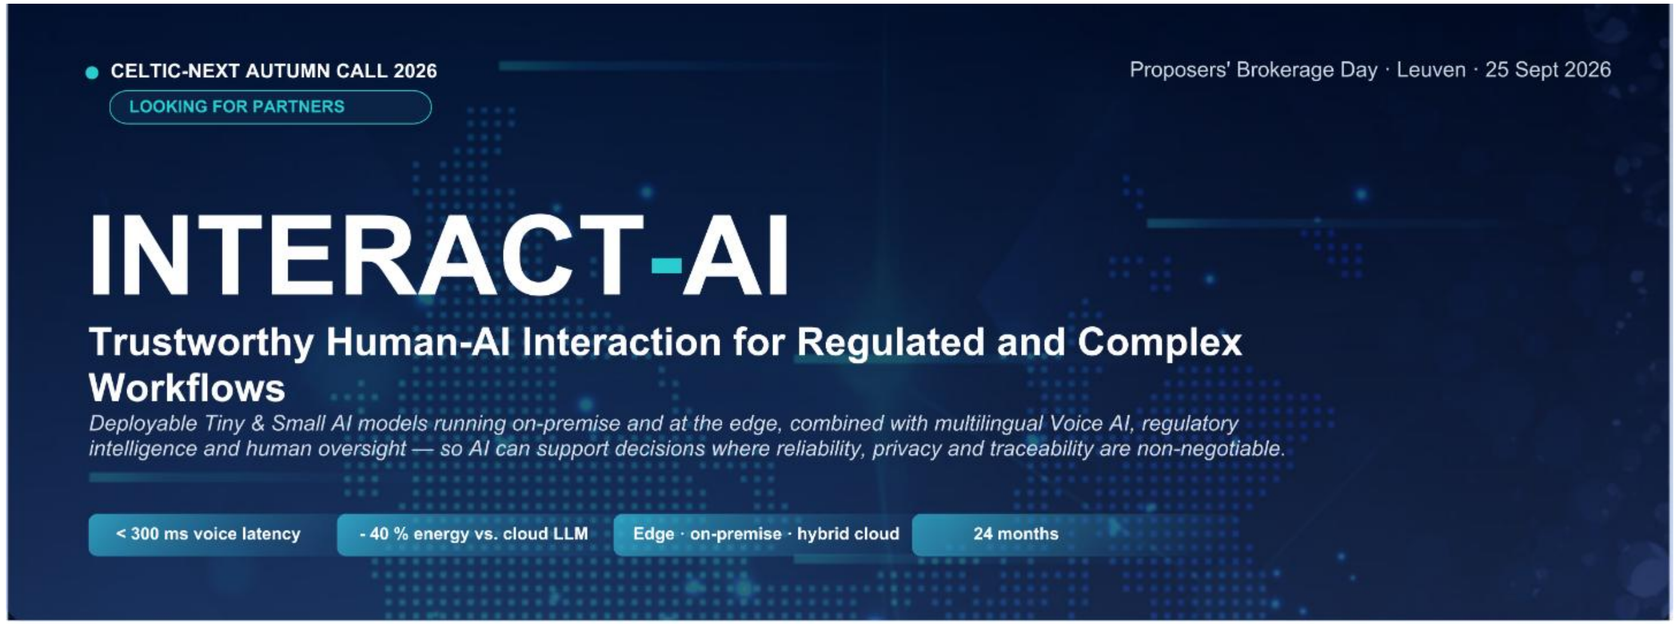
CELTIC-NEXT
Proposers Brokerage Day
25th September 2026, IMECin Leuven, Belgium



Emre Uygur, PhD · Project Coordinator · ENM Digital
emre.uygur@enmdigital.com

Why INTERACT-AI

Reliable AI interaction where cloud-only systems fall short

<300 ms

target voice latency

40%

target energy reduction vs. cloud LLMs

3 modes

edge, on-premise and hybrid cloud

Partners gain a common platform for secure multilingual interaction and auditable domain decisions in real operating environments.

Organisation Profile

ENM Digital

Technology company based at Manisa Celal Bayar University Technopark in Türkiye. We build on-premise AI, Turkish language models and multilingual voice agents for operational use.

- Coordinator expertise
- Tiny and Small AI models
- Speech, ASR and PBX/VoIP integration
- Cloud-edge orchestration and production deployment

22

team members

13

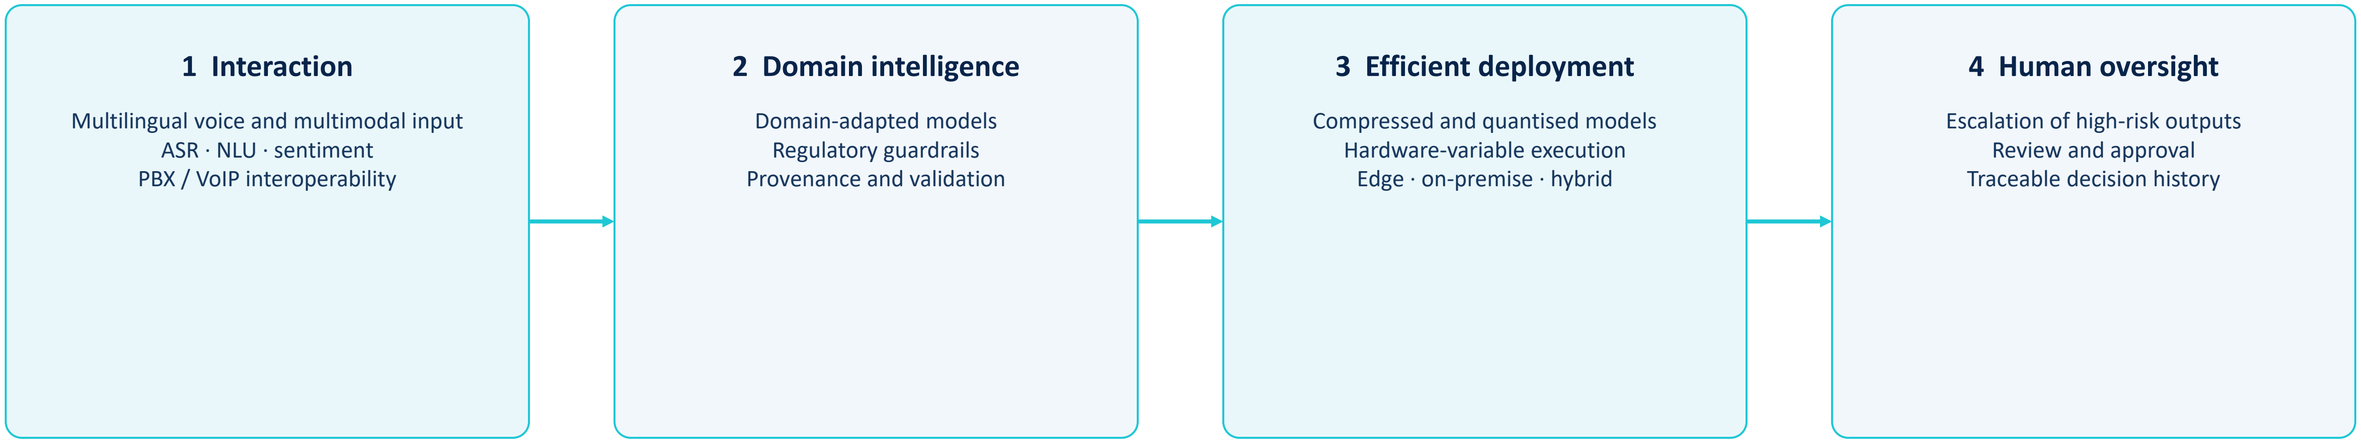
software engineers

4

voice AI sectors in live operation

Trusted interaction, deployed where data lives

One framework connects real-time interaction to domain reasoning, controlled deployment and human accountability.



Shared framework, validated in financial services, film and TV incentives, and immigration and international recruitment.

24-month delivery plan and target outcomes

<300 ms

voice latency target

–40%

energy target vs. cloud LLM

3 pilots

shared framework, sector validation

M1–4

Requirements, data governance and baseline

M3–10

Tiny/Small AI, voice and regulatory components

M8–18

Use-case integration and interoperability

M14–22

Pilot operation and independent validation

M20–24

Deployment playbook, exploitation and standards input

Consortium and open roles

We are looking for

FINANCIAL END-USER PARTNER
Bank, insurer or fintech ready to host a pilot, define real customer-interaction scenarios, provide anonymised test data and validate the platform in a regulated production-like environment.

UNIVERSITY OR RESEARCH INSTITUTE
Expertise in trustworthy AI, Tiny and Small AI compression, regulatory NLP or Human-AI Interaction. The partner will lead scientific validation and contribute to standards.

Complementary profiles are also welcome: film and TV, immigration and recruitment, and telecom operators.
