

CELTIC-NEXT DAY

02nd December 2020, 09:30 – 16:00 CET

Pitch of the Project Proposal

Massive IoT over High Density LoRaWan Networks

Iñaki Etxebarria
inaki.etxebarria@fon.com

Teaser

Future LoRaWAN® networks will be dense due to the simplicity of the solution and the increase of the demand of this solution, besides dense networks provides big benefits like longer battery lifes of the nodes, better geolocalization

*Validation of future massive network deployment and new commercial use cases
Validation of new business models and new use cases under dense LoRaWAN® networks*

We believe in massive unlicense network deployments for the development of new innovative solution and opportunities for the industry

Organisation Profile

Fonlabs is an innovation, R&D company with more than 8 years giving solutions under WiFi, 5G and IoT.

We are part of Fon Group (www.fon.com) that managed more than 25 millions Hotspots around the world in a massive deployment.

We are focused in the development of new connectivity solutions to respond the global hyperconnectivity demand

Proposal Introduction

*Massive deployment simplified
New services proposal validation
Architecture designs
Network management orchestration
New business model validations
Software and Hardware development
new opportunities,*

Proposal Introduction

- *Massive deployment simplified*
- *New services proposal validation*
- *Architecture designs*
- *Network management orchestration*
- *New business model validations*
- *Software and Hardware development new opportunities,*

- *Publication & Thesis & Collaboration*
- *Proof of Concepts implementations*
- *New business models*
- *New hardware*
- *New software solutions*

Partners

LoRaWAN® Hardware manufacturers

LoRaWAN® Software providers

IoT platforms

Smart Home companies

Universities - Research Centers

Telecommunication Service Providers

Call for interest to join
